SUMMARY

Software engineer with 8+ years of experience shipping design systems, banking apps, auction platforms, AI agents, and healthcare software for enterprise clients. Currently building healthcare solutions at Jaya Tech. Previously built LLM-powered products and AI agents at Caylent on AWS. Co-founded Konkreta, Brazil's main concrete ordering platform, and founded Engenharia Livre, an engineering blog with 40k+ followers. Started in civil engineering — graduated, managed construction projects — then made the leap to software.

EXPERIENCE

Software Engineer · Jaya Tech

Apr 2025 – Present

Development of healthcare solutions.

- Building software for the healthcare market

Software Engineer · Caylent

Sep 2024 – Apr 2025

Built AI-powered products on AWS, including internal LLM chat tools and AI agents for business automation.

- Built an internal ChatGPT-like tool where users can select LLM models, upload documents, and chat — using Amazon Bedrock, Lambda (Python), DynamoDB, and React
- Developed AI agents to increase customer conversion and product utility using Amazon Bedrock and CrewAI
- Implemented quality evaluation tests for AI agent responses and RAG pipelines with DeepEval

Software Engineer · Trela

Nov 2021 – Jul 2024

Full-stack development on a Next.js platform, building design systems, BFFs, microservices, and data infrastructure.

- Built a custom design system with React and Styled Components, tested with Jest and Playwright
- Optimized SEO for the Next.js application
- Migrated styles from Styled Components to CSS Modules for better performance
- Created BFFs to connect microservices using Koa and GraphQL
- Built and migrated microservices from Flask to FastAPI
- Deployed applications on AWS using Terraform via GitHub Actions
- Created data dashboards using Snowflake and Metabase
- Implemented feature flags on backend and frontend (Unleash, then PostHog)
- Implemented an AWS Lambda proxy for feature flags
- Used the outbox pattern for microservice messaging with RabbitMQ

Software Engineer · DBServer

Oct 2020 – Oct 2021

Migrated a banking application from Angular to React and built supporting design systems and backend services.

- Migrated a banking application from Angular.js and Angular 2 to React
- Created a design system with React and Styled Components, documented with Storybook
- Used MobX for application state management
- Built the application BFF with Nest.js

Training Instructor · Gama Academy

Jan 2021 – Feb 2021

Taught web development to aspiring developers.

- Delivered training on React, Next.js, Storybook, CSS Modules, Jest, Cypress, and TDD
- Mentored career-changers entering the tech industry

Software Engineer · Avanade

Jul 2019 – Oct 2020

Built design systems, auction platforms, and internal tools for enterprise clients in healthcare, mining, and cosmetics.

- Built a custom design system from scratch for QSaúde using React, Stitches, and Radix
- Developed an iron ore auction system for the Chinese market for Vale using the WeChat MiniProgram framework
- Documented the entire legacy C# backend and started migration to Node.js with full test coverage
- Trained frontend engineers in React, Jest, SWR, and Cypress
- Developed a Microsoft Dynamics application in Mithril.js and React
- Created internal tools with React for Natura

Software Engineer · VOLLUP.COM

Feb 2019 – Jun 2019

Built digital marketing solutions for mid-to-large companies with PHP, JavaScript, and WordPress.

- Developed custom WordPress themes
- Built a PHP system to convert Photoshop designs into HTML layouts for web and email marketing
- Configured high-performance servers for WordPress hosting

Co-Founder · Konkreta

Jul 2018 – Apr 2019

Co-founded Brazil's main concrete ordering platform.

- Built the ordering platform with Ruby on Rails
- Established commercial partnerships with concrete suppliers in the São Paulo metro area
- Routed customer orders to the nearest suppliers

Technical Director · Constrinew Engenharia

Jun 2017 – Apr 2019

Managed residential and commercial construction projects, including electrical and plumbing design.

- Designed and implemented residential electrical and plumbing systems
- Managed and planned residential and commercial construction projects
- Hired technical teams for all construction phases

Intern · Pöyry Tecnologia

Mar 2015 – Jun 2016

Developed engineering projects and implemented advanced solutions with Revit, Excel, Access, and VBA.

- Developed engineering projects using Revit
- Implemented advanced engineering solutions with Excel, Access, and VBA

Bilingual Technical Support Specialist · TeleTech

Apr 2012 – Feb 2015

Provided bilingual technical support for shared web hosting services, bridging Brazilian and US/Mexico teams.

- Served as the technical point of contact with the foreign shared hosting provider
- Translated demands between the Brazilian and US/Mexico teams
- Last point of contact and resolver for customer service issues

Backoffice · TeleTech

Jan 2009 – Aug 2012

Analyzed and resolved email deliverability and shared hosting issues, and trained new customers.

- Analyzed and fixed email deliverability issues
- Analyzed and fixed shared web hosting problems
- Trained new customers on internal tools

Developer · Blog da Engenharia

Aug 2014 – Jan 2015

Developed and maintained an engineering blog on WordPress, including custom themes and job board integration.

- Developed a custom WordPress theme optimized for email capture
- Built a job board connected to vagas.com.br
- Migrated the blog to a more robust AWS server
- Automated social media publishing for new articles

SKILLS

Frontend: TypeScript, React, Next.js, Tailwind CSS, Design Systems, Storybook, CSS Modules, Styled Components

Backend: Node.js, Fastify, Nest.js, Cloudflare Workers, Python, FastAPI, GraphQL

AI / LLM: Amazon Bedrock, CrewAI, RAG, DeepEval, LLM Integration

Cloud & Infrastructure: AWS, Terraform, GitHub Actions, Docker

Testing: Vitest, Jest, Playwright, Cypress, TDD

Data: Snowflake, Metabase, RabbitMQ

EDUCATION

Bachelor in Civil Engineering

2012 – 2016

Universidade Anhembi Morumbi

Extension Course in Software Testing

May 2021 – Jun 2021

Universidade Federal de Minas Gerais

Extension Course in Modern Software Engineering

Sep 2020 – Dec 2020

Universidade Federal de Minas Gerais

LANGUAGES

Portuguese (Native speaker) · English (Professional)
